From zero to champions

We are national champions! We're going to Singapore for the World Finals of the [STEM Racing](#) competition!

It all began with a leap of faith a hesitant "yes" to a STEM competition backed by Formula 1 that pushed my teammates and me beyond what we thought was possible. We weren't experts, just a group of passionate students determined to grow. From learning 3D design and marketing to raising \$1,300 and winning regional titles, our journey took us from 15-year-old students to the provincial champions of Quebec.

But our success didn't stop there. With the support of our school and our own determination, we raised \$13,000 and made it to the North American national finals. As an all-girls team in a male-dominated field, we stood out and not just because of our red uniforms. We are proving to the world that women are as competent as man in STEM fields and are fighting to encourage other girls to do the same.

We are now qualified to represent Canada at the international finals 80 teams 40 countries. The largest international STEM competition in the world We've proven our determination, our skills, and our resilience. To take this next step, we need YOUR support. A partnership will help cover travel, equipment, and registration costs and turn our dream into reality. We're not just racing; we're redefining what young girls can achieve in STEM. We are breaking barriers.

Everyone has a dream inside them, like an engine quietly waiting to be started. For us, that ignition moment is now. We've built our dream piece by piece, honing our skills and taking every curve with determination and heart. We're on the starting line of the biggest race of our lives.

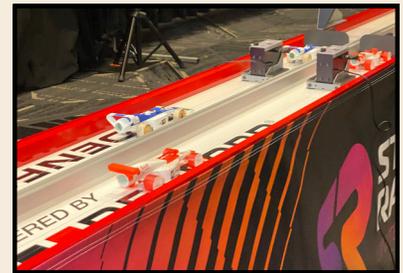

But even the best car can't move without fuel. **You're not just funding a team you're giving five girls the momentum to chase a dream.**

Help us cross that finish line for us, and for every young girl who dares to believe she belongs in this race.

Believe in us.

**Because you don't have to be exceptional to start —
It's by starting that you become exceptional.**

The Challenge

What is Stem Racing?

[STEM Racing](#) (formerly F1inSchools) is a non-profit organization orchestrating the **largest international competition** in science, technology, engineering and mathematics. Aimed at young students aged 9 to 19, the competition is designed to stimulate their interest in these fields through an educational, interactive and stimulating project. **Supported by Formula One**, Stem Racing brings together more than 20 million students from around the world each year since its creation in 2004.

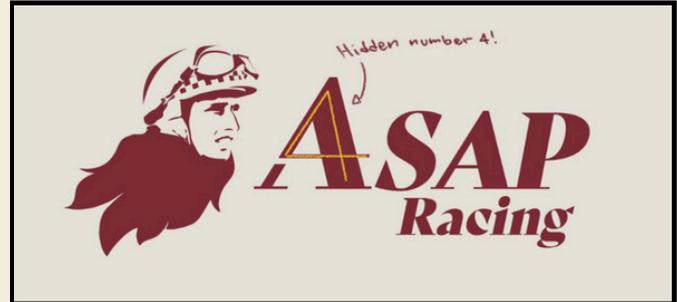

What we do?

Teams, embodying an amateur F1 team, must produce a miniature car powered by a CO2 cartridge, which will be raced on a 20-meter track. However, beyond on-track performance, the heart of the challenge lies in the design process: participants must master aerodynamics, engineering and project management to design a competitive vehicle. **Engineering, management, marketing, sustainable development, teamwork, communication** - it's all there. This competition encompasses all aspects of a complete project, offering participants concrete learning opportunities.

About Us

Our team goal? **Spotlight the many inspiring and impactful women working in STEM.**

The ASAP Racing team logo revolves around Maria Teresa de Filippis, the first women Formula 1 race driver to have ever competed in a Grand Prix. **We honour the women who have paved the way for us in the past while taking the next step to shape a better future.**

As **students of 15 and 16 years of age** passionate about STEM, we aim to be role models for other girls who dare to dream just like we did. We believe that women have the same rights as man to excel in the STEM fields and want to educate the future generations not to hesitate when taking their rightful place. **We defend social sustainability.**

We want to demonstrate that with determination, anything is possible, even **as women in a male-dominated field.**

Our Team:

Azure Klopp
Team Manager

- 2e place au Jeu de Montréal en Natation Synchronisée
- A participé dans une pièce de théâtre

Léa Leduc
Ressource Manager

- Enseignante de ski et natation certifiée
- Multiples certification dans le domaine de la santé

Maily Zhang
Media Manager

- Fait partie d'une organisation de bénévolat
- Prend des cours d'anglais, mandarin et maths extracurriculaires

Magnolia Pilot
Manufacturing Engineer

- Sergeant au cadet aérien du Canada
- Certification de voile des fédérations canadienne et française

Sen de Montigny
Design Engineer

- Participe à des compétitions de maths internationales
- Fait du bénévolat à des courses rallyes locales

Become A Partner!

YOUR reasons to partner with US!

We are a determined team that succeeded on its first year of competition to secure a spot at the international competition.

We won 2nd place in Canada!

In addition, we also won six different prizes:

- **The Best Engineered Car Award**
- **Sustainability Award**
- **The Best Pit Display Award**
- **Scrutineering Award**
- **The Best Verbal Presentation Award**
- **Women In Motorsports and STEM Award**

We will be representing Canada internationally in Singapore next October.

The three best teams of each country participating in the competition move up to compete at the highest level. They showcase determination, perseverance and commitment through this last step of the journey of Stem Racing.

1. Partner with a Prestigious Global Program

Align your brand with F1 in Schools—a respected, forward-thinking international initiative committed to inspiring the next generation to pursue STEM careers.

2. Boost Your Visibility

Benefit from widespread exposure through local, national, and international marketing channels and multimedia coverage.

3. Support Education in Your Community

Demonstrate your commitment to educational advancement by becoming an active community partner.

4. Connect with a Valuable Audience

Reach and resonate with experts, educators, and students both nationally and globally.

5. Be Part of Technological Innovation

Immerse your company in a dynamic environment centered on cutting-edge technology and real-world applications.

6. Encourage Equality and support Women In STEM

Become part of the change focused on empowering young women to succeed in a male-dominated field.

7. Support Sustainable Development

We, along with STEM Racing, promote socio-economic and environmental sustainability and take concrete action to make a difference.
